1) Introduction

Welcome to the MemeMap Project Whitepaper, a comprehensive document designed to provide a detailed overview of the innovation ecosystem that brings together verified meme tokens. This white paper outlines the concept, technology and strategic plan for MemeMap, an ambitious project that leverages the power of the BEP20 network to offer unique and immersive experiences to users around the world.

At the heart of the MemeMap token is a platform that will determine the top 20 best meme tokens on a weekly basis, an ecosystem designed to provide user integrity and a fun environment for trading verified meme tokens in a thriving digital economy. And the MemeMap token will mediate between the buyer/seller and the TOP 20 tokens.

What to Expect

This document is designed to help readers understand the complex details of the MemeMap project, from the innovative MeMa token designed for internal purchases of meme tokens (TOP 20) and the use of the MemeMap token to pay for gas, to the complex MemeMap platform that aggregates liquidity from different blockchains, improving the trading experience of users.

We will strive to implement all this constructively, we understand the complexity and know where to go.

Vision and Commitment

The MeMa (MemeMap) project is based on the desire to harmonize the verified meme token realm by creating a platform where users can engage in secure trading and meaningful community interaction. Our commitment to innovation, safety and user satisfaction is the cornerstone of this project, guiding our development and strategic decisions.

As you delve deeper into this whitepaper, expect to gain a comprehensive understanding of solar energy.

The MeMa ecosystem, its components and how they interact to create innovative platform that is at the forefront of blockchain technology.

2. MemeMap Token

Launch Details

The MemeMap token was launched on the BEP-20 network, which aims to enable his purchases. Token contract address **0x2B198B46b359d2ab98ABDeE99453bb6F603501C3** which can be checked using BSCSCAN.

Tokenomics

The initial circulation volume is set at 7777777777777777 tokens with multiple token burning phases up to a final supply of 4000000000000 (process until 2026), this process is necessary to maintain holders through rewards.

Distribution of tokens: 20% iron liquidity, 5.5% to the MeMa team, the remaining tokens will be distributed for listing on exchanges. We are ready to give some of the tokens free of charge to exchanges (high-quality, proven, reliable) but only for the purpose of allowing people to be able to buy and sell MemeMap tokens .

Conclusion

Factions and metrics on the MeMa network represent an innovative step towards creating a decentralized exchange that is not only a trading platform, but also a hub for community engagement, competition, and integration with various blockchain networks. By creating a competitive environment for collaboration through factions and ensuring transparency and growth through rigorous metrics tracking, MeMa is poised to offer a unique and immersive experience that sets a new standard for decentralized exchanges.

3. Roadmap

You can track the development of the project on this page of our official website
